

Chiropractic

Chiropractic care for horses and dogs focuses on the diagnosis, treatment and prevention of mechanical disorders of the skeleton and muscles, especially the spine. Treatment of misalignments and tight muscles can improve general health, sports performance and the nervous system health.

- **Restore Proper Motion in Spine and Limbs**

Manual examination and adjustment of the neck, back, ribs and limbs

- **Optimize Nervous System**

Releases pinched nerves, nerve signals are transmitted efficiently, and muscles relax

- **Promote Healthy Organ Function**

Proper nerve function will lead to healthy organ function especially the musculoskeletal system

- **Natural Approach to Animal Health Care**
