

Cindy and Coco

Cindy and Coco

On September 20, 2017 Coco accidentally got closed in the garage door. She was rushed to the vet, and fortunately did not have anything broken but did not have use of her back legs. She had feeling in both hind legs and her tail. Her tail had movement! We brought her home with anti inflammatory medication. I started daily massage. One week from the accident I started chiropractic, acupuncture, and magnawave with Dr. Christine. The first video is the day after her first treatment. She showed wonderful improvement, being able to stand and walk. The last video is of her today with full movement! Coco received 3 chiropractic, acupuncture, and magnawave treatments. I am so thankful for Dr. Christine for helping my Coco, who is 14 years old return to a normal life!

Thank you for all you do for my fur babies!!
