

# Lily the Pug

Dr. Christine has been instrumental and a true angel to our precious pug, Lily, who is going on 18! We were sent home in September, 2018 from a local vet's office with the guidance that Lily would slowly fade away and there is nothing more they can do. Not settling for that answer, and with a little research we found Dr. Christine! In Dr. Christine's care, we implemented a chiropractic and acupuncture regimen, changed a few supplements and implemented a raw diet, even though a local traditional vet was adamant that Lily stay on a dry kidney care kibble. Today, Lily truly is living a healthy and joyful life! With Dr. Christine's amazing care and love we'll be forever grateful for the additional time that we've been gifted with Lily on the earth plane!!
